Deploying FileBrowser

Linux Training Academy

Lesson Overview

➢ How to deploy File Browser.

Why Use File Browser

- Command line can feel **intimidating** or **complex**
- File Browser simplifies tasks like:
  - **Creating** directories
  - **Uploading** configuration files
  - **Editing** configuration files
- Great for those who prefer web-based tools over the terminal

GUI Tools vs Command Line

- This course involves deploying services requiring config file changes
- Tools like **Portainer** and **File Browser** offer web-based editing
- Choose a GUI if you value visual tools
- **Command line remains an option** for those comfortable with it
